

How can we make our community more age friendly?

People are living longer and wanting to stay in the communities they call home.

How could infrastructure and services be improved to ensure older people can maintain participation in our community?

The Shires of Murray and Waroona are working together to determine the age friendliness of our local communities and how we can all be more inclusive and supportive of older people.

Come along and join in the conversation about living locally as you get older at one of our upcoming Community Forums. We value your contributions and ideas.
